# BATTLE FOR EVERY HOLE!

For ten years you've trained to be a Ninja. And now your Master tells you that it's time to take the final, most difficult test and become a Master Ninja. You must complete the game of death. You must play nine holes of... Ninja Golf?

You knew your Master was a bit weird, but nothing prepared you for this! You must attempt to sneak in a birdie between karate kicks while you battle Ninja opponents. Par for this course means leaving the green littered with fallen foes.

You gain points for both your golf game and defeating attacking Ninja. You can also earn points for finding treasures and other bonus items along the course.

Once you've completed all nine holes successfully, be ready to challenge the disguised Master Ninja. This final battle will determine whether or not you become a Master Ninja. And if you win, it will improve your golf score!

## GETTING STARTED

1. With your 7800 game system switched off, insert the Ninja Golf cartridge into the cartridge slot as described in your owner's manual.
2. Connect a controller to controller port one. Press the **POWER** button on your 7800 game console.
3. Switch on your TV.
4. The Ninja Golf title screen appears. Press a controller button to view game options. Move the controller left or right or press **SELECT** to display the desired difficulty level (Easy, Normal, Hard, or Kamikaze). The higher the difficulty level, the more enemies appear on the

course. And the enemies get progressively tougher to destroy! Press either fire button or **RESET** to select the displayed option and begin your round of Ninja Golf.

## Optional Game Controls

The following optional game controls are available:

- To pause the game press **PAUSE**. Repeat to resume play
- To return to the title screen and restart the game, press **RESET**
- To return to the title screen and restart the game with the currently selected difficulty level, press **SELECT**

## PLAYING THE GAME

Ninja Golf is a fast moving game combining martial arts action and the challenge of video golf. At the beginning of the game you receive ten throwing stars and two extra lives. On every hole you can find additional throwing stars, magic shields to protect you from enemies, and items to increase your health rating or give you extra lives. (See **Items**.) The game is over when your health rating reaches zero and you have no lives remaining.

The Action window shows game play, including enemy encounters and items to be retrieved. Move your controller right to move forward, left to move backward, and down to crouch. To pick up an item, position your Ninja over the item and crouch. To kick, press the right controller button. To leap, press the left controller button. To throw a star, push the right controller button when the controller is in the neutral position or when your Ninja is crouching.

Each of the nine holes of Ninja Golf offers unique challenges. The first challenge on every hole is to aim your shot carefully to place the ball onto the green.

Use the Golf window to aim your shot. Your tee off position is shown by the flashing white ball, and the current trajectory is displayed by the shooting white ball. Move your controller to change the trajectory of the shot. When the shooting white ball reaches the best destination, press either controller button to choose that destination and swing. Once the ball is hit, your Ninja jogs after it.

On your way to retrieve your ball, you will be set upon by a variety of dangerous foes. Fierce frogs will leap at you, Ninja guards and warriors will attack without mercy, and golf course gophers will fling clods of mud. You must aim your shots carefully to avoid sand and water traps. Deadly snakes await you in the sand traps, and every water trap is infested with hungry sharks.

After you land on the green you must face a special challenge to place the ball in the hole. Press the fire button to shoot Ninja stars directly into the mouth of the fire breathing guardian of the hole. You can only carry ten Ninja stars at one time. When you deplete your supply of stars, move to the far left to replenish your supply. Kill the guardian to progress to the next hole. Dodge while you shoot, or your Ninja will end up a crispy critter for the guardian to devour.

When you have successfully destroyed the guardian, the hole SCORE screen appears. This screen displays information about your performance on the hole you just completed: the number of the hole, the number of strokes it took you to land on the green, and the number of bonus points you received.

Press the fire button to display the game SCORE screen. This screen displays the total number of strokes you have used. (Press the fire button to resume play.)

You earn points for destroying golf course foes and retrieving bonus items. You also receive points for making great golf shots. The less strokes you use to land on the green, the more points you receive.

# SCREEN

The Action window is where game play takes place. The Golf window shows the trajectory of your golf shots, and the Status window displays game information.

## Status Window

The Status window displays the following game statistics:

**Score** displays the score for the game in progress.

**High Score** is the highest score achieved during the current play session.

**Health** shows the life energy level of your current Ninja. When your health level reaches zero and you have an extra life remaining, your health rating returns to full force when the new Ninja takes over.

**Ninja Stars** display the number of throwing weapons you have left.

**Lives Remaining** displays the number of extra lives you have left.

**Shield Time Remaining** displays the number of seconds your shield will remain active. This section of the Status window will only display when you have an active shield.

## ITEMS

To pick up an item, move your Ninja over the item and crouch. The following items can be found on every hole:

**Throwing Stars** allow you to attack your enemies from a safe distance.

**Magic Shields** provide total invulnerability for 15 seconds. The shielding begins when you pick up the Magic Shield.

**Revitalization Potions** increase your health rating.

**Restoration** brings your health rating back to the maximum level.

**Free Man** gives you one additional life.

**Warp** teleports your Ninja to the green.

## STRATEGY

Save your Ninja stars for the more difficult sections of the game (water and forest areas).

For a higher score, take the shortest path between the tee and the green.

Sometimes the Ninja that runs away (or jumps over his enemies) lives to fight another day!

## SCORING

You receive points for eliminating enemies, making your golf shots, and picking up items.

### Golf Scores

Eagle.....	8,000 points
Birdie.....	7,000 points
Par.....	6,000 points

### Enemies

Ninja Warriors.....	170 points
Animals.....	100 to 200 points

### Items

Power ups and treasure.....	10 to 50 points
